

List of front loader models fit to the tractors DECEMBER 2024

Please provide the tractor's production year with each order.

Please also order the mountings ONLY for those tractor models that are placed in list. If, in your opinion, they also match with others, you order them at your own risk.

COMMENTS:

According to the list if it is written BACK SOCKETS (connection with 2 hydraulic hoses), the hydraulic connection is connected to the quick coupler, then we ONLY send this version of the 2 hydraulic hoses. Possible conversion to connection hydraulic the pump (connection with 3 hydraulic hoses) but you do it on your own and at your own risk. In this case, please indicate this intention in the order - then you will receive version which you want - hydraulic distributor for connection to the pump.

PUMP LS – If there is a sign (LS) then the tractor must already have the "POWER BEYOND" cube or it must be purchased by the customer for this tractor.

"+" - next to the front loader model - it is extended/wider version of the loader dedicated to the tractor model.

**ARBOS**
